I. GUI Test Cases

A. *AppRouter*

1) Test-01:

Input: Navigate to login page by entering app URL
Expected output: The Login Page is displayed

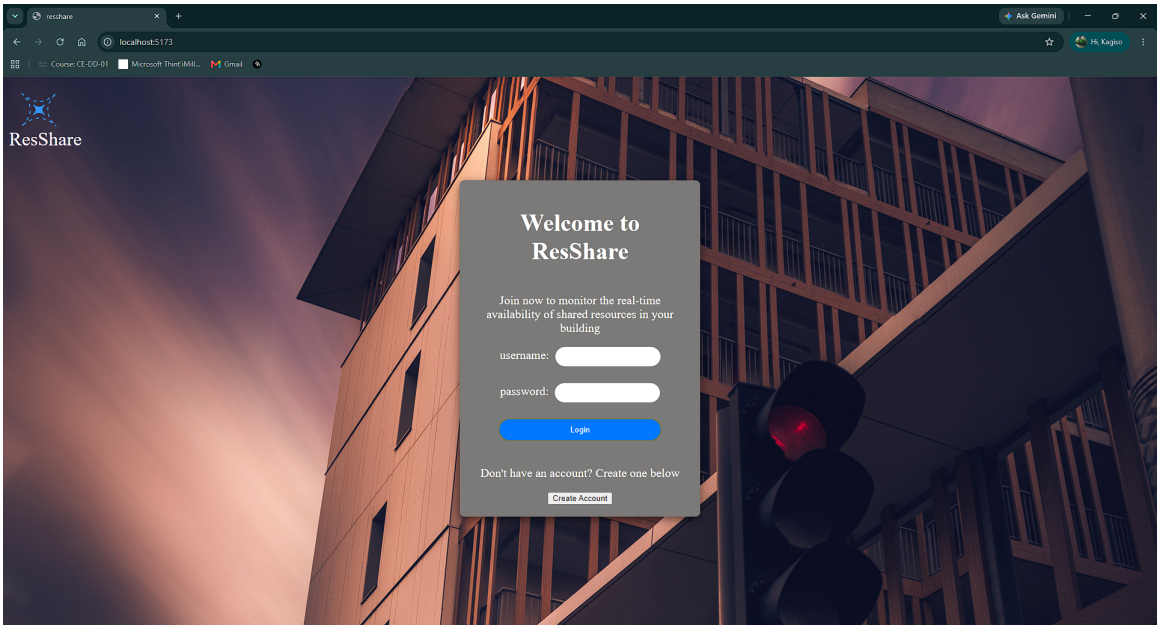

Figure 1: Login Page

Outcome: PASS

2) Test-02:

Input: Navigate to a protected page without authentication
Expected output: Access is denied and the user is redirected to the login page.

Comment: When a user attempts to navigate to Dashboard or the Admin Page, the user's request is rejected and is immediately redirected to the login page.

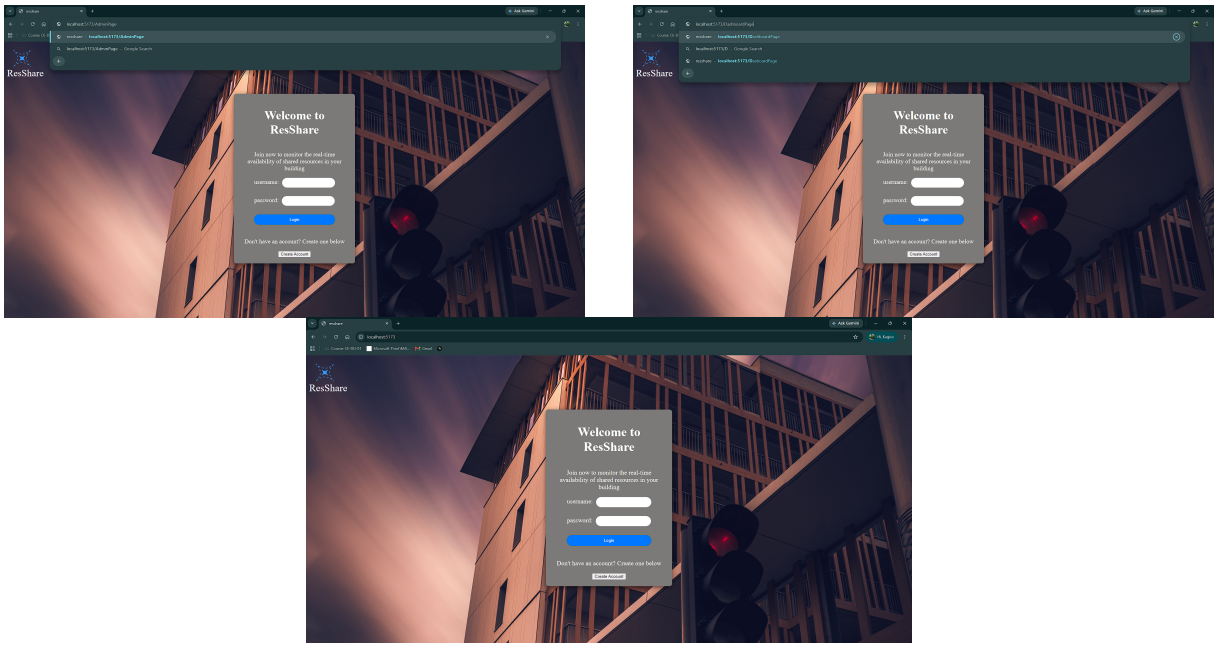

Figure 2: Navigate to protected pages without authentication

Outcome: PASS

B. Login Page

1) Test-03:

Input: Submit valid login details
Expected output: The credentials are submitted for authentication, and the user can proceed after successful authentication.

Comment: When a student user entered the correct credentials, the student is authenticated and then redirected to the Dashboard page.

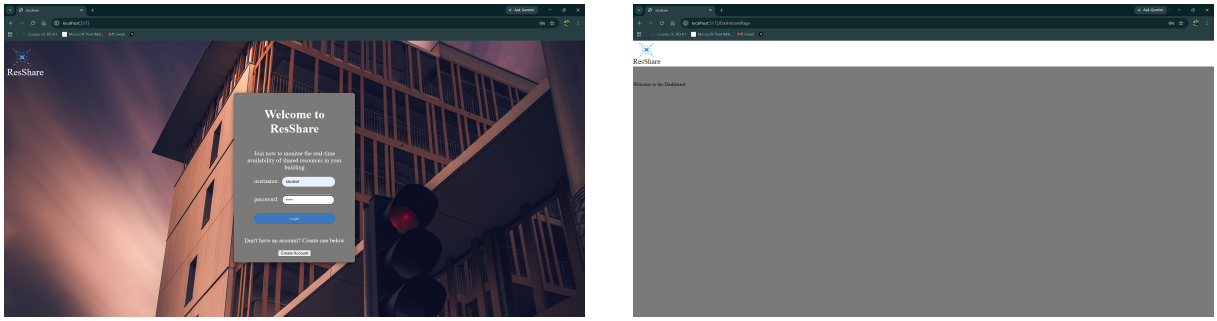

Figure 3: Login Page

Outcome: PASS

2) Test-04:

Input: Submit incorrect login credentials.

Expected output: An authentication error is displayed and access is denied

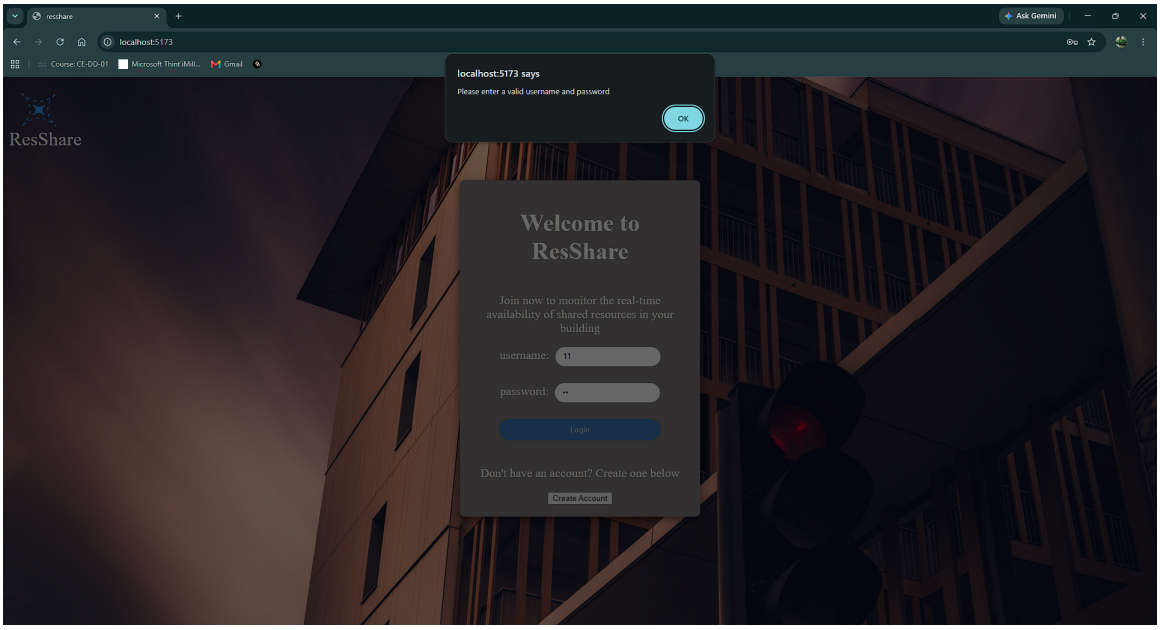

Figure 4: Use Cases

Outcome: PASS

3) Test-05:

Input: Submit login form with a required field left empty
Expected output: The form is rejected and the missing information is indicated

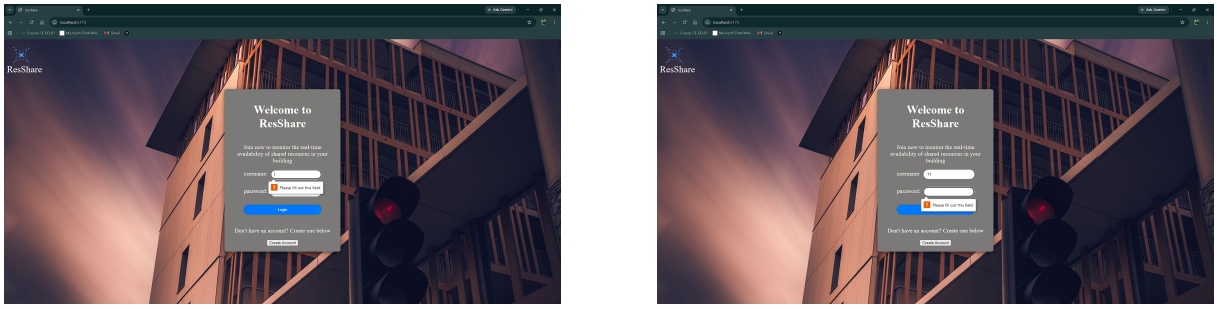

Figure 5: Submit with empty required fields

Outcome: PASS

4) Test-06:

Input: Click create account to register new user

Expected output: A registration form appears and allows new users to input their details.

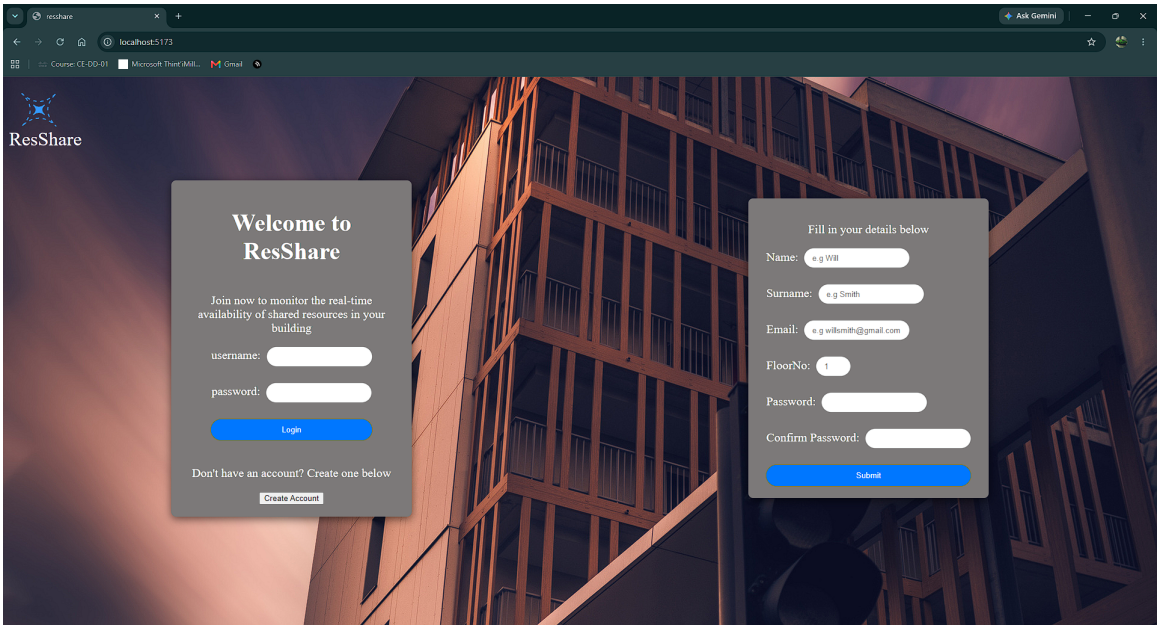

Figure 6: Create account

Outcome: PASS
